### Seaweed Marbling

Marbling takes its name from the way designs on marbled fabric can resemble the veins and ripples in marble stone. A seaweed extract called carrageenan is used to create a thick syrupy water that the paint is floated on. Thus, the name, "seaweed marbling."

In this workshop, students use various objects such as forks, chopsticks, toothpicks or corn holders to create their own design in the floating paint, then make their print by placing fabric on the paint-covered surface of the water. We will print on both fabric and paper.

## Suzanne Drown Trout...

I am a teaching artist who loves to bring the creative experience to students of all ages. I have been teaching art to both children and adults for more than 25 years, most recently at Fiddlehead Center for the Arts in Scarborough, Summer Stage @ Studio 408, Artascope Studios and Spiral Arts. As a teacher, I love it when a student gets excited about the creative process! When I hear them go "cool" or "wow," it makes my day. For more information about my experience or my art please visit [www.suzannedrown.com](http://www.suzannedrown.com).

I always welcome your feedback! If you have ideas for a class you would like to see offered, let me know. Can't make these class times work for you? Gather your friends and create your own class! Call me at 409-4897 or e-mail me at [sue@suzannedrown.com](mailto:sue@suzannedrown.com).

I am pleased to talk with you about workshops for adults or youth at your location, including artist-in-residence opportunities. Groups can create individual projects or work together to create banners, quilts, or other pieces for installation in your school or organization.

Please call (207) 409-4897 for more information or go to my website: [www.suzannedrown.com](http://www.suzannedrown.com)
